

FORT BUILDING

May 16-20

This past week the children here at Corpus Christi have been working hard before and after school to build forts out of the mats. Using teamwork, children helped each other take the mats off the wall, drag them across the gym and, set up the forts.

Throughout the rest of the week, Children continued working together, experimenting with different ways of building so they could create the best fort ever!

We observed children using communication and problem-solving skills along with engaging in imaginary play and a lot of creativity!
